All good

Make the teaching more practical based and interactive

None.

Paper 2 syllabus and still be narrowed down at TY level for Life sciences

Coping up with new teachers becomes difficult in mid semester. So if teachers are same for the whole year it is better.

Our syllabus should be research oriented and updated.

AAA courses are being charged which is simply to say - Give money and take credits. This really demotivates students to do interdisciplinary courses which is the main aim of introducing AAA credits.

NA.

Can reduce the syllabus withing the units atleast in sem 5

For CA's, please it's a request that we get the topics for assignment and the portion well before the time. For notes, share them as soon as the topic is over or it gets really hectic for students to ask repeatedly. Maybe a survey like this should be done in the middle of the year; not the teacher's feedback survey.

No.

JHC is best

College can have LED TV in every classroom and lab which can greatly help teachers in teaching like for presentation, showing videos, writing and etc.

The CA's are a little pressuring as time is very less for completing the CA 2's along with giving the CA 1 exams. More time is required for each semester in the biotechnology department atleast.

Spent a valuable and good time at jai hind College , learnt a lot from teachers and peers , thankful to the faculty

Practical learning should be encouraged more rather than just teaching in classrooms. Interaction and communication based activities should be inculcated.

Not any suggestion as such but the whole Jai Hind faculty, staff members are doing an amazing work.

Please get good teachers in BMM Ad. Only the permanent faculty is nice. Rest most visiting faculties are terrible and give no learning or experience whatsoever . Please give a legit credit course card or certificate MENTIONING THE CREDITS of the course WE PAY FEES FOR and opt. It is disheartening to only get a certificate where the word 'credit' is not mentioned at all. Or else, keep it optional altogether.

The topics and evaluation methods of CA2 can be much more interactive and the overall study can be research oriented along with applications of the readings in current life. The course could also have options of additional studies of elective topics on the field/subject of study.

The AAA credit system could also have been a bit more flexible

More focus on the quality of academics.

Would appreciate if the college could host a convocation for us .

BMM specifically should and could've been more connected to the real world. Very less that was given to us in order to attract the job world, very few practical and focused skills imparted. The course could have been designed better to cater to the profess world, ie. Moving towards specialisation. A student graduating from Jai Hind BMM is sometimes as clueless as they were when they joined. Ones who aren't, they might not even think of crediting the institution. The department definitely needs a strong, experienced, and an innovative HOD.

No suggestions.

Everything's great!

It would be great if we have a convocation organised

Not required

Nil

This college is for students, but everything about it feels like it's against us.

Since we graduated.

Please keep our convocation ceremony

I've had a wonderful 5 years at Jai Hind College. Years that I'll never forget, and would love to end those years with a convocation! Requesting you all to please have a convocation ceremony for us, thank you.

Please have more extra curricular activities for BCOM batch

We really want a convocation, just want to meet everyone one last time and celebrate the 5 years we spent in Jai Hind. It's our second home. We need a convocation pleaseeeee!!!!

None just keep on improving ..👍

Not really... though, thank you!

No suggestion from my side college is amazing and so are teachers

Please have our convocation soon

N.A

Can we please have a convocation

—

The college culture is great and awesome in all the streams

Should have given us (batch 2019-2022) a graduation ceremony.

Many more flexibility in learning and practical work.

I really loved being taught in such a Great highly reputed college. It has always been my dream to pursue my degree in jai hind college. I'm overwhelmed being a JAI HIND ITE. I'm Forever proud of being a Jai hind ITE. Just waiting for the CONVOCATION CEREMONY cuz we have given final exams in Offline mode so we deserve it !

1. Faculty teaching sessions should be monitored on random checks
2. Students should be informed about certain mandatory things like holidays, late lectures, extra classes beforehand to be able to attend them in a timely manner

Assessment conducted in CAs are often not justified, leaving the students clueless with regard to how they can improve!

Classes can be made a little more interactive

Online classes was a hurdle to our growth

Should not have written exams to base someone's capabilities and define him by a grade system because of those marks. Should have other methods of grading (for SEE) like group discussions, etc.

If exam is needed, should give lesser weightage to exam and more to do internals.

Nothing as such

Sometimes internals are held very last minute and they all get piled up towards the end of the semester when there are exams as well so it becomes pretty a hectic for a student. So if they are more spread out throughout the semester to reduce the burden towards the end, it might help reduce the workload for the student.

Please give us a graduation, we've barely had an offline college experience.

Jai hind college is best college for study N for college festival also N I love jai hind crowd

No Suggestions.

We can be have a better breakdown in terms of dates

our batch have a convocation please

Provide lectures on diff. Carrier opportunities in every department at the end of program which help to shape the carrier for students.

no.

My honest feedback would be that there is more scope of improvement in the course. Just like student councils most of the work can be distributed. Let students take decisions on what would they like a guest lecture on. Before fixing a guest lecture. Curate a quiz or check their interest. This will make the students understand as it is why certain courses are necessary of AAA lectures. Most of the time AAA felt like a burden to be completed rather than a fun experience. If this can be curated in the right form. Everyone can make most out of it. Study material if given in advance would be great! Just like when a student transitions from class A to B all the required books are handed over to him at once. He/she can go through it. One more major point. In todays day and age everything can be searched and the knowledge of it can be taken through individual researching. To add more value to the course continuously speaking with the experts in the industry and keeping things up to date will be beneficial. Guest lectures keep happening with industry experts. But if industry expert's insights are incorporated in the syllabus or teaching itself would be helpful. For instance, we had strategic management, through case studies we understood the concepts. But hands on experience on what exactly happens in the corporate world or how is studying in college different than gaining experience in the industry different? How can we adapt to the corporate world while being in a designation which requires strategic management.

These were some of the honest suggestions that can bring the course even higher and valuable to the students.

The teaching pattern of the course is really good.

Would prefer to include subject matter & learnings that are actually needed real job markets. For instance: Consultancy, Python, etc

If bms starts a minor specialisation as well, it would be great. For eg I took marketing as a major but i would have loved to learn a little about finance as well. Hence doing a minor in finance would have been great.

No particular suggestions

For BMS - can have a mix of made groups and self made groups for projects
Working in groups was a great experience but if we could be put in different situations with people we don't know it would foster our learning more and would be helpful even in the workplace to have such an experience

none

No suggestion needed

None, the curriculum was excellent and the faculty was amazing.

Practical based approach should be more in use

Everything's good overall

Professors need to go beyond traditional instructional mode of teaching and make it a more participative, two way process.

Syllabus can be made more holistic and application oriented for certain papers, rather than merely theoretical.

More modern perspectives on various topics could be added (English dept has done an amazing job in that), as there's a need to move beyond the classical and traditional viewpoints and perspectives.

Thank you

Best experience ever!

Jai Hind Is All together a great place academically

Proud to be a Jai Hind-ai

Be more open to helping students

Please give a graduation ceremony to us 😞

Nil

It was a huge learning experience through jaihind, I would say I am a completely changed person from what I was before jaihind, it has taught me the best for real life situations

Everything was fabulous from educators to the learning experience!

I think Finance can include subjects in much more depth, eg. teaching financial modelling

For Multimedia, having a professor who is aware of new and updated version and models and skills was very much necessary.

Thank you for everything Jai Hind College. Will be forever grateful 🙏

It was all good
